Enrichment activities in math, vocabulary building, science & social studies 3. Social-emotional development 4. Self-confidence 5. Habits of successful students |
| To Consider: | With the limited time in class, parents must commit to working at home to adequately prepare child for Kindergarten. | For children with a robust play schedule and extra-curricular activities, this class prepares them with the beginning academics and habits needed for kindergarten. | This class is for children who flourish in school and love the routine, but still need a nap or a lot of down-time. | This class is for students with a solid recall of letters/sounds/ numbers and are prepared to sit in circle 3+ times a day, can listen to a story and answer questions, can follow directions, have a natural curiosity AND can go long periods without rest. |
